

March 2025 LILUG Meeting

March 11th, 2025 @ *Digital Ballpark* Pace-notes by *Chris Trimble*

News & Small Talk

- [Android is getting a native terminal App](#)

Kreativo 3D Printing

- AI-driven mobile app using prompts to generate designs
- Designs can be shipped to the user from printers in New York
- Kreativo is considering franchising print operations, similar to drivers in Uber.
- Commissions based printing based on size
- Some moderation on designs
- Alternative to 3D design software
- Current size limit is 256mm², as this is the size limit of the 12 printers currently in service.

Discussion

- Challenges in different printers or settings
- Licenses and copyrighted materials/topics are unexplored
- *Who owns the designs?*

Current Stage of Development

- Selling products locally, incubating

Back-end Service Infrastructure

- API calls to other AI systems and then interfaces with AWS for web delivery through site or app.
