

February 2026 LILUG Meeting

February 10th, 2026 @ [Digital Ballpark](#) Pace-notes by [Chris Trimble](#)

News & Small Talk

- LILUG Hangout: Thursday February 19th at Dave & Buster's Westbury
- Thanks to Paul for providing food.
- Discussion of database management and legacy software
 - Microsoft Access
 - SQL
 - Programming Projects & Client Expectations

Main Discussion: Paul Trapani - Obsidian editor/markup managment system

[Obsidian](#): a note-taking app

- Licensing: Source-available but there is a custom license and access to beta features can be obtained earlier by buying commerical or "Catalyst" licensing.
 - Since the content is written in Markdown there is no vendor lock-in.
- PKM: Personal Knowledge Management
 - An early example of PKM is [HyperCard](#)

Obsidian Features

- Cross Platform
- Local Storage (can be synced to cloud of course using something like [Nextcloud](#))
 - Alternatively Obsidian has their own cloud sync called [Obsidian Sync](#).
 - Git is possible
- Obsidian app has different folders and split screen
- Stylize the notes using [Markdown conventions](#).
 - Menus can help with formatting
- Custom hot-keys and shortcuts
- Config and documents are stored in a folder called a [Vault](#). These folders can be sent to different computers.
- Images and metadata can be attached
- Coding is supported but it is not a strong IDE; it is better for viewing code or embedding snippets into documentation for display

- *Obsidian Bases*: Can make database of documents to scroll through
- Automatic Saves
- Command palate
- *Graph View* can show related notes
- Publish features which can push files to remote sources

Plugins for additional features:

- [Note Refactor](#): Highlight text in one note and send it to a new note.
 - Can make first line the title of the note.
 - Export to PDF is built-in or added with an add-in called [Pandoc](#).

PKM Structures

[Forum Post on Obsidian.md about Folder Systems](#)

- ACE (By Nick Milo)
 - Atlas
 - Long-lived knowledge and concepts
 - Calendar
 - Log, events, time-related
 - Hold To-Do lists for each date
 - Efforts
 - What is being worked on
- PARA
 - Projects
 - Areas
 - Resources
 - Archives
