August 11th, 2026 @ [Digital Ballpark](#) Pace-notes by [Chris Trimble](#)

News & Small Talk

- Dreamhost hosting for LILUG.org is going to be phased out, so we are considering alternatives
 - Mailing list is on Dreamhost
 - Data will be exported to a new platform, we need to determine a new location to replace Mailman
 - Self hosted versus mailing list service or other asynchronous service
 - Groups.io, or other email services
- AMD Vulkan Linux drivers ported to Windows: (Youtube - Brodie Robinson)
[<https://www.youtube.com/watch?v=bh8uippvOYA>]
- Mozilla revokes signing key for Firefox and Thunderbird (Hacker News)

- No LILUG Picnic coming up

Main Discussion: Syncthing by Matthew Newhall

(Syncthing Documentation)[<https://docs.syncthing.net/index.html>]

- Peer to peer file sharing and syncing
- Uses NAT traversal
- a sync daemon is needed for each device, so there is no client or server
- file versioning is present
- send only or receive only folder
- several clients exist, including [Syncthing-GTK](#)
